#5 tee: 150-174 yard avg. drive
#6 tee: 125-149 yard avg. drive

***A word from your Golf Course
Superintendent: Andy Woolston***

[*andywoolston@cypresslakesgolfclub.net*](mailto:andywoolston@cypresslakesgolfclub.net)

February was a rough month for us with cold and rain the first three quarters of the month. The last week was an improvement with warmer temperatures. The forecast for March is to have a little warmer and drier weather compared to average. That will be great for us, so let's hope it works out as forecast. We are eager for the soil to dry out so we are able to finish and clean up drainage projects that we started. Rebuilding a couple of new tees is also on our project list.

We will again have a company come in to slit in Fipronil which controls mole crickets and fire ants. This is planned to take place Thursday the 25th.

Thanks for your support as we do our best to make Cypress Lakes a fun place to play golf.

Turf Tip of the Month

March is a transition month with ever changing conditions. This is hard on many plants because they are coming out of dormancy and have tender new growth. Still stay aware of low temperature and cover your flowers and plants if necessary. It is best not to overfeed plants until the weather gets more consistent.

Andy

Rule of the Month

Question: After marking my ball, I tapped down my ball marker and walked away. I didn't realize that my ball marker stuck to my putter head. What do I do? Is there a penalty

Answer: There is no penalty and you must replace your marker on its original spot or as close to it as you can.

Rule: 13.1d

Good Luck! John

Pro Tip of the Month
(Oldie but goodie)

Keep your right hand connected during transition. Nearly eight out of ten people I teach have a problem with keeping their right hand connected with their left (opposite for lefties) during the transition of their back swing and down swing. This problem will cause many of your miss hits like “pulling the ball”, “snap pull hooks” & “topping the ball”. One way to check to see if you have this problem is to take a back swing and stop it at the top. Then look at the palm of your right hand and see if it is still touching your left thumb. If there is any separation at all, you would be one of the eight I mentioned above. This is one of the most important pressure points of the grip. Keep pressure on your left thumb with your right palm during the transition to correct the problem. If you correct this problem, straighter and more solid shots will follow.

Try these tips and I promise they will help your game.
Good Luck! John
