**A word from your Golf Course
Superintendent: Andy Woolston**

andywoolston@cypresslakesgolfclub.net

September should be a little drier and less humid if we can avoid getting any tropical systems coming our way. We are still busy with mowing and set up on a daily basis. This month we are also spraying pre and post herbicides to suppress weeds.

Our continued goal is and always will be to improve the golf course. The excessive rain we have had the past few weeks has not only made it challenging to mow but also to do routine maintenance practices. One thing you can help with is by keeping the carts (and pull carts) out of wet areas and on the cart paths around the tees and greens. Thank you for your support as we strive to make Cypress Lakes Golf Club a fun place to play golf.

Turf tip:

Late season fertilizer should contain a high percentage of Potassium. There are three numbers on a fertilizer analysis. The first number is Nitrogen, second is Phosphorus, and the last number is Potassium. Potassium is important for root development, increases plant hardiness, and aids in spring green up.

Pro Tip of the Month

(oldie but goodie)

It's HOT!!

If your hands sweat a lot, you probably wear a glove. To prolong the life of your gloves and for better performance, alternate them between holes. Never wear a glove for two holes in a row. In this heat, I rotate 3 gloves during the round. The gloves dry out before rotated back in to play. Your gloves will last longer and perform better.

DO NOT leave your clubs in your trunk during the summer. The trunks get so hot that it can ruin your grips and it could also loosen the heads of your clubs.

Try these tips and I promise they

will help your game.

Good Luck! John

Rule of the Month

Question: I chunked my chip shot, then I flinched and accidentally double hit the ball. I heard there is not a penalty for this any more. Is this correct?

Answer: That is correct. You just play the ball where it ended up. No penalty

Rule: 11.1a

Good Luck! John
